

# REGENERON

## TREATMENT PROCESS FOR LONG-TERM CARE FACILITIES

### TOTAL TREATMENT TIME: ABOUT 1 HOUR & 20 MINUTES

Facility healthcare providers and clinical staff are more than welcome (and invited) to assist our team on the date of our visit, which may help to facilitate quicker treatment sessions.

## TREATMENT PROCESS

### ✓ STEP 1

#### CLINICAL ASSESSMENT – ELIGIBILITY

Clinical providers will do a clinical assessment of patient to ensure eligibility of treatment, as well as best route of administration. Two routes of administration: Subcutaneous/intravenous.

### ✓ STEP 2

#### CLINICAL ASSESSMENT – TREATMENT

Clinical providers will do an assessment of the patient to determine the best route of treatment. The clinical decision will be made between the provider and patient.

### ✓ STEP 3

#### TREATMENT

Treatment will be administered over the course of 20 minutes.

### ✓ STEP 4

#### OBSERVATION

Patient will be observed in the observation unit for 60 minutes.

### ✓ STEP 5

#### DOCUMENTATION

Clinical technicians will handle documentation throughout procedure and conclude documentation at the end of observation period.
